1.0 INTRODUCTION

The Council and Administration of the Village of Edgerton has, with the assistance of the Planning Branch of Alberta Municipal Affairs, developed this strategic plan to serve as a general guide for policy and decision making. This is not a comprehensive guide to community growth and development.

A strategic plan analyzes internal and external factors that impact on a community's growth and development. It also identifies strengths and weaknesses of a community and examines opportunities as well as threats. Based on this information council developed a mission statement and a set of six supporting goals.

2.0 PURPOSE

This plan has three purposes.

- 2.1 To develop a mission statement for Edgerton.
- 2.2 To identify goals required to achieve the mission.
- 2.3 To outline a strategy that identifies actions, responsibilities, timelines, and budget considerations for the implementation of goals.

The reader will note that this plan contains no objectives. Council decided that since implementation of most of the goals in this plan depends on the implementation of other plans containing specific objectives (e.g. Community Futures Program and the Community Tourism Action Plan); including objectives at this level would be redundant.

3.0 OVERVIEW

Before developing a "Mission Statement" council looked at national and global trends to determine how they might affect the growth and development of Edgerton over the next 5 years. In order for Edgerton to grow and develop it must adapt to these trends.

3.1 Economic Trends

- 3.1.1 Free trade Council believes that for the next 5 years free trade will have a minimal affect on Edgerton's growth and development.
- 3.1.2 Oil prices Council believes that low oil prices will have a negative impact on citizens who drive oil tanker trucks. High oil prices will benefit these truckers.
- 3.1.3 Emergence of the Pacific Rim Council believes that there may be an opportunity to bring in new investment from the Pacific Rim.
